

Test report **SUB +**

Cute and muscular

SWEDEN: HiFi & Musik, April 2002

"We have never seen a cuter dollhouse HiFi than Audio Pro Sub +."

"This small and stylish cube has a 6,5" woofer aimed forwards, loaded with bassreflex with a funnel-shaped downfired reflex tube in the bottom of the box."

"The heavy bass and the authority that comes from this small sub, can make anyone choke. The fact that it can compete with much larger subwoofers is only that an achievement, and also sound both deep and sharp, is a smaller sensation."

"The warmth, weight and the fine connection to the room is what you remember after listening to Sub+."

"This is the tests cheapest subwoofer and it is a real bargain."

SUBWOOFERS IN THE TEST: Audio Pro Sub+, Audio Pro EGO SUB, Canton AS22, Eltax Atomic A-15, Jamo E6 Sub, KEF PSW1000, Pioneer SV-150, Yamaha YST-SW305
